

technical details

Factor	Size
Height	4,00 m
Area	30 sqm
Output	8 Kwp

Example calculation:

Area	8,7 ha
Solar modules	96 Stück
Total Output	796 Kwp
Yield expectation approx.	700.000 kWh/year

advantages of FIELD PV

- Dual use with real added value.
- No restrictions in yield and cultivation.
- Also suitable for high crops.
- Additional yield due to electricity production of up to 70,000 kWh per ha.
- Alignment of the modules independent of the cultivation direction.
- Diagonal working still possible.
- Blends into the landscape and is wildlife friendly.
- Ideal in combination with suckler cow husbandry.

farming is you.

We are **4DISC** – a community of farmers, fruit growers and machine builders who solve typical problems in agriculture and fruit growing.

We are happy to help! Further information can be found at www.4disc.de.
